- Advance yourself to a Master Wall Builder
- Qualify to attend Advanced Residential Certification Course for Business Development and Customer Engagement
- Annual rewards program (Get contractor bags, dead blow hammers, levels, & more)
- ICPI Accredited Course (7 Credits)

AB Contractor Certification Workshop

Enhance your knowledge and learn the Best Practices approach to quality segmental retaining wall installation.

This three-stage program blends the details of wall design and the experience of wall construction to help us define each contractor's individual level of ability and service. This on-going certification program takes you and your team through the different levels of certification. Working through the levels of the AB Contractor Certification Program, we will show you why training can be your best resource to build a high quality engineered retaining wall. **This course is your opportunity to enhance your knowledge and learn practical skills that have helped thousands of professionals build their SRW wall construction business.** As the industry continues to grow and advance, the requirements for contractors to be certified in SRW practices is becoming the standard and is part of the Best Practices Design initiative for zero wall failures. This course is nationally accredited to fulfill this requirement while providing valuable information and hands-on experience.
