

Attendees can expect to gain the following skills:

- Recognize the advantages of SRW's
- The principles of wall design and how SRW products work
- Why retaining walls fail and learn about our path to Zero Wall Failures
- Learn what tools and support are available to help you bring more value to your customer and business
- The principles of design guidelines, what should be provided in shop drawings, submittal packages, and preconstruction considerations.
- Create CADD formatted shop drawings with general notes, plan, elevation, panel sections, and typical details.
- **Receive Free AB Walls Software with AB CADD - retail value \$750.00**

AB Design Professional Seminar

The road to best practices and realizing the significant saving using the right tools.

The intent of this seminar is to provide an understanding of the concepts, tools, programs, and support that will help you master the art and science of more effective land development, this will help your clients and generate business opportunities for you.

We will outline a full program that supports the concept of achieving “Zero Wall Failures with Best Practices for SRW Design” by understanding how SRWs work, a review of Best Practices for SRW Design, and then training on our software. Our AB Walls Design software is **free** to use and is built to better communicate the details and

determination of technical analysis for both construction drawings, and technical submittal packages with real time personal training and support, and will save time and money on each and every project.

8:30 am – Registration/breakfast
